Skills

Languages: Java, Python, JavaScript, SQL, MongoDB.

Technologies & Tools: NodeJS, ReactJS, Strapi, Postman,

Work Experience

Sankey Solutions, Thane

Nov 2024 – Feb 2025

Backend Developer Intern.

- I developed several features for the HRMS Portal at Sankey Solutions, including Comp-Off utilization and a Change Request system. The Comp-Off feature allows employees who work on weekends to request a comp-off, which HR or team leads can approve or reject, with a validity of three months. Leave requests prioritize comp-off first, then paid leave, and finally unpaid leave if no balance is available. The Change Request feature allows employees to return or reassign comp-off if needed.
- Additionally, I created a Bulk Attendance feature that allows for mass attendance updates. If the biometric system fails, the system automatically marks all employees as absent. A cron job checks for missing in/out times and adjusts attendance status to WFH/Present/Half Day for those without approved leave for the day, while preserving the status of employees with approved leave. If marked absent incorrectly, leave is credited back to the employee.
- Other smaller features include displaying late check-ins and attire compliance on the frontend. I've tested all these features, and they are now live in production.

Insys Technologies

Aug 2020 - Mar Sept 2021

Cyber Security Intern

- During my one-month internship as a Cyber Security Intern, I gained hands-on experience with tools and concepts related to Cyber Security and Ethical Hacking. I became proficient in using VMware and Kali Linux, along with other operating systems, to perform various security tasks.
- I acquired foundational networking knowledge and developed practical skills in footprinting, network scanning, vulnerability scanning, cryptography, and mobile computing. Working with Kali Linux, I quickly became familiar with its tools and successfully applied them to perform security assessments.
- Throughout the internship, I was active in learning Cyber Security and Ethical Hacking concepts, gaining a deeper understanding of how to identify and address vulnerabilities. My ability to manage tasks efficiently and work independently helped me complete assignments in a timely and professional manner.
- In addition, my strong written and verbal communication skills allowed me to present findings clearly, ensuring effective collaboration and reporting.

Education

Bharati Vidypeeth College of Engineering, Navi Mumbai

Nov 2022 - Jun 2025

B.E. in Information Technology

CGPA: 8.20/10

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advance Data Structures and Algorithms, Information Retrieval, Sensors.

Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems, Computer Networks.

Project Work

- **Garage application using Java, SQL.**

This comprehensive app offers a range of features, including tire changes, painting, dent removal, and general servicing. By providing users with easy access to a variety of repair services and support options. Its user-centric design simplifies the process of scheduling and managing repairs, making it an essential tool for drivers in need of reliable and efficient vehicle care.

- **Electricity Bill Payment system using Java, SQL.**

Developed an electricity bill payment system using Java and SQL to streamline the billing process for users. The system features a user-friendly interface built with Java, allowing customers to easily view and manage their electricity bills. On the backend, SQL databases are used to store and retrieve billing information, track payments, and manage user accounts efficiently.

- **Website for Clothing brand with affiliate marketing using MERN.**

Customers can explore a range of products and easily manage their orders, while small business owners can list their own items and track sales. The platform also features affiliate marketing integration, enabling businesses to earn additional revenue by promoting related products.

Certificates

- MERN Stack from Udemy.
- Advance Java Course from Anubhav Computers.
